---

## EDUCATION

---

### UNIVERSITY OF NORTH CAROLINA – CHAPEL HILL, NC

- Ph.D. *Environmental Sciences and Engineering* **May 2014**  
◦ *Advised by Dr. Greg Characklis*
- M.S. *Environmental Sciences and Engineering* **May 2010**
- B.S. *Environmental Science* **May 2007**

## PROFESSIONAL EXPERIENCE

---

### NORTH CAROLINA STATE UNIVERSITY – RALEIGH, NC

- Assistant Professor, *Dept. of Industrial and Systems Engineering* **July 2023 - present**
- Adjunct Assistant Professor and Graduate Faculty, *Dept. of Civil, Construction, and Environmental Engineering* **Aug 2018 – present**
- Graduate Faculty, *Operations Research* **Aug 2018 – present**
- Graduate Faculty, *Dept. of Forestry and Environmental Resources* **Aug 2018 – present**
- Assistant Professor, *Dept. of Forestry and Environmental Resources* **Aug 2018 – June 2023**

### UNIVERSITY OF NORTH CAROLINA – CHAPEL HILL, NC

- Adjunct Assistant Professor, *Dept. of Environmental Sciences and Engineering* **Aug 2018 – present**
- Associate Director, *Center on Financial Risk in Environmental Systems* **July 2017 – present**
- Research Assistant Professor, *Institute for the Environment* **July 2015 – Aug 2018**
- Post-doctoral Researcher, *Institute for the Environment* **June 2014 – June 2015**
- PhD Student, *Dept. of Environmental Sciences and Engineering* **Jan. 2009 – May 2014**

### BCS, INCORPORATED – WASHINGTON, DC

- Research Associate **June 2007 – June 2008**

## FUNDING

---

**Totals:** \$3.29 million directed to Kern Group out of \$73.20 million in collaborative awards.

(Collaborator) - **Bezos Center for Sustainable Protein** at NC-State (2024-2029). \$30,000,000 total award.

(co-PI) – **DOE Digitizing Utilities** – (2024-2025) “Storm-Based Outage Prediction to Aid Crew Dispatch Decisions”. \$75,000 total award.

(co-PI) – **Alfred P. Sloan Foundation** – (2023-2025) “Reservoir dead pool in California: Understanding Sensitivities, Consequences, and Potential for Risk Mitigation”. \$49,000 (out of \$249,000 total award).

(co-PI) – **NSF Hydrologic Sciences** – (2023-2026) “CAS-Climate: Reservoir dead pool in the western United States: probability and consequences of a novel extreme event”. \$130,000 (out of \$800,000 total award).

(co-PI) – **DOE RACER** – (2023-2024) “Resilient Renewable Energy to Diminish Disaster Impacts on Communities”. \$1,000,000 total award.

(Collaborator) – **DOE Water Power Technologies Office** – (2023-2024) “Value of flow forecasts to power system analytics.” \$85,000

(PI) -- **NSF CAREER** – (2022-2027) “Navigating a Two-Front Challenge for the Power Grid: Extreme Weather and the Race to Decarbonization” \$503,897.

(co-PI) -- **NSF STC** – (2022-2027) “Science and Technologies for Phosphorus Sustainability (STEPS) Center” \$25,000,000 center award.

(co-PI) -- **DOE Office of Science** – (2021-2025) “Integrated Multisector, Multiscale Modeling (IM3), Phase 2.” \$431,000

(co-PI) -- **NSF Dynamics of Coupled Natural Human Systems (CNH2)** (2020-2023) “CNH2-L: The coupled, co-evolving roles of drought and electricity systems in humans' exposure to air pollution.” \$370,688 (out of \$1,600,000 total award)

(co-PI) -- **DOE Advanced Research Projects Agency – Energy (ARPA-E)** (2020-2023) “GRACE: A Grid that’s Risk Aware for Clean Electricity.” \$345,444 (out of \$2,400,000 total award)

(co-PI) -- **DOE Bioenergy Technologies Office** (2020-2023) “Agent-based Modeling for the Multi-objective Optimization of Energy Production Pathways.” \$300,000 (out of \$1,000,000 total award)

(co-PI) -- **Game-Changing Research Incentive Program for Plant Sciences Initiative (GRIP4PSI)** (2020-2023) “Harnessing (bio-)electrochemical technologies as sustainable sources for on demand precision agriculture.” \$250,281 total award

(co-PI) -- **North Carolina Policy Collaboratory** – (2019-2020) “Assessing Operational Flooding Risks for Substations and the Wider North Carolina Power Grid.” \$60,000

(Collaborator) -- **DOE Water Power Technologies Office** – (2019-2020) “Value of flow forecasts to power system analytics.” \$75,000

(Collaborator) -- **DOE Office of Science** – (2019-2020) “Integrated Multisector, Multiscale Modeling (IM3): Model Intercomparison to Inform the Development of Open Source, Grid Scale, Power System Simulation Tools.” \$73,756

(Collaborator) -- **NSF Innovations and the Nexus of Food, Energy and Water Systems (INFEWS) – Track 1** (2017-2021) “Scarcity Amid Abundance: Understanding Trade-offs in the Food-Energy-Water Nexus in the Willamette River Basin” \$312,000 (out of \$2,995,151 total award)

(co-PI) -- **DOE Productivity Enhanced Algae and Tool-Kits (PEAK)** (2017-2021)  
“A comprehensive strategy for stable, high productivity cultivation of microalgae with controllable biomass composition.” \$120,682 (out of \$2,896,676 total award)

(co-PI) -- **NSF Innovations and the Nexus of Food, Energy and Water Systems (INFEWS) – Track 2** (2017-2021). “The sustainability-productivity tradeoff: Water supply vulnerabilities and adaptation opportunities in California’s coupled agricultural and energy sectors.” \$330,000 (out of \$2,958,000 total award)

## AWARDS

---

### **MASON-MARYLAND ENERGY AND CLIMATE POLICY FELLOW** **2024**

- Selected to attend an energy and climate-tech innovation policy “boot camp” for early career researchers funded by the Alfred P. Sloan Foundation, featuring discussions with key players shaping the energy and climate-tech policy landscape in Congress, the executive branch, international organizations, NGOs, and the private sector.

### **NSF CAREER** **2022**

- The National Science Foundation's most prestigious awards in support of early-career faculty who have the potential to serve as academic role models in research and education.

### **JUNIOR FACULTY DEVELOPMENT AWARD** **2015**

- Competitive award (\$7,500) given by the office of the Executive Vice Chancellor & Provost based on proposal to integrate research and teaching in development of an upper level undergraduate/masters course in energy systems modeling and analytics

### **HYDROPOWER RESEARCH FOUNDATION** **2010 – 2013**

- PhD fellowship covering full tuition and living stipend awarded to outstanding early-career researchers pursuing research in hydropower; made possible by a grant from the Energy Efficiency and Renewable Energy Program of the U.S. Department of Energy

- Merit-based scholarship for tuition, room and board, awarded to incoming undergraduate students at the University of North Carolina at Chapel Hill who demonstrate academic achievement and exhibit strong leadership potential

## TEACHING

---

### Undergraduate

- (NCSU) ES 300 – Energy and the Environment
- (UNC) ENEC 307 – Energy and Material Flow through the Environment and Society
- (NCSU) ISE 437 – Data Analytics for Industrial and Systems Engineers

### Undergraduate/Graduate

- (UNC) ENEC 490 – Energy Systems Modeling and Analytics

### Graduate

- (UNC) ENVR 755 – Analysis of Water Resource Systems (co-taught)
- (UNC) ENVR 890 – Managing Environmental Financial Risk (co-taught)
- (NCSU) ISE 601/801 – Departmental Graduate Seminar

## JOURNAL EDITOR

---

Earth’s Future (*Associate Editor*), 2022 – present

## INVITED TALKS

---

1. Kern, J. “Optimal design and management of low carbon energy systems in a time of emerging vulnerabilities.” University of Virginia Department of Systems and Information Engineering, April 2024.
2. Kern, J. “U.S. West Coast Droughts and Heat Waves Exacerbate Pollution Inequality and Can Undermine Emission Control Policies.” Mt. Sinai Health System, NYC, November 2023.
3. Kern, J. “Modeling the multi-scale, multi-variate uncertainties that impact electricity system dynamics under global change.” AGU Annual Meeting, December 2022.
4. Kern, J. “Market and operational weather risks in the U.S. western power grid”. AGU Annual Meeting. December, 2021.
5. Kern, J. “Power Systems Analysis for Assessing Physical and Financial Risks from Extreme Weather”. Google X Speaker Series. November, 2021.
6. Kern, J. “Weather Risk and Power Markets”. Energy Infrastructure Resilience and National Security Workshop, October 2021.
7. Kern, J. “Weather Risk and the Grid.” UNC Chapel Hill Dept. of Environmental Sciences and Engineering Centennial Seminar Series. January, 2021.
8. Kern, J., West, J., Yates, A., Pavelsky, T., Skiles, M., Bowden, J., Characklis, G. “Drought Can Take Your Breath Away.” North Carolina Museum of Natural Science, Science Café. October, 2020.
9. Kern, J., West, J., Yates, A., Pavelsky, T., Skiles, M., Bowden, J., Characklis, G. “Drought Can Take Your Breath Away.” Sigma Xi. January, 2021.
10. Kern, J. “Quantifying risks from spatially and temporally correlated hydrological and meteorological processes in wholesale electricity markets”. Pacific Northwest National Laboratory, June, 2019.
11. Kern, J. “Quantifying risks from spatially and temporally correlated hydrological and meteorological processes in wholesale electricity markets”. University of Stuttgart. Stuttgart, Germany, April, 2019.
12. Kern, J.D, Zeff, H., Herman, J., Reed, P., Characklis, G., Medellin-Azuara, J., Pavelsky, T. “Challenges and opportunities in modeling cross-scale, cross-sector feedbacks to inform critical decision-making in food-energy-water systems”. European Geophysical Union. Vienna, Austria. April, 2019.
13. Kern, J.D, “Challenges and opportunities in modeling cross-scale, cross-sector feedbacks to inform critical decision-making in food-energy-water systems”. Tufts University, Seminar Series in the Dept. of Civil and Environmental Engineering, Boston, MA. March, 2019.

14. Kern, J. "Addressing Complex, Emergent Risks in 21<sup>st</sup> Century Natural-Engineered Systems". Lake Johnson Community Center, Raleigh, NC. October, 2018.
15. Kern, J.D, "Challenges and opportunities in modeling cross-scale, cross-sector feedbacks to inform critical decision-making in food-energy-water systems". North Carolina State University, Seminar Series in the Dept. of Civil, Construction and Environmental Engineering. Raleigh, NC. October, 2018.
16. Kern, J. "Addressing Complex, Emergent Risks in 21<sup>st</sup> Century Natural-Engineered Systems". BioQUEST Summer Workshop, Harvey Mudd College. June 21, 2018.
17. Kern, J. "Addressing Complex, Emergent Risks in 21<sup>st</sup> Century Natural-Engineered Systems". Oregon State University, Dept. of Biological and Ecological Engineering. June 1, 2018.
18. Kern, J. "Sustainable Energy Infrastructure Systems in an Age of Interconnection, Uncertainty, and Innovation." Duke University Nicholas Institute for Environmental Policy Solutions. June, 2017.
19. Kern, J. "Environment, Economy, Entrepreneurship: Is Clean Energy Good Business?" A Town Hall Discussion, North Carolina Museum of Natural Sciences, July 2016.\
20. Kern, J. "Weather and Climate Risk in the Electric Power Sector." Federation of Earth Science Information Partners Summer Meeting, Durham, NC. July 2016.
21. Kern, J. "Implications of a More De-coupled Water-Energy Future." National Science Foundation and Association of Environmental Engineering and Science Professors Grand Challenges Workshop, Washington, DC. May 19-20, 2016.
22. Kern, J. "Environmental Financial Risk in the Electric Power Sector". North Carolina State University, Department of Civil and Environmental Engineering. Seminar Series, October 2015.
23. Kern, J., "Is Solar the Answer?" North Carolina Museum of Natural Science, Raleigh, NC, July 2015.
24. Kern, J. D., "Can Fracking Lead to Less Expensive Achievement of More Natural River Flows?" American Geophysical Union Annual Meeting, San Francisco, CA, December 2014.
25. Kern, J., "Water, Energy, Finance and the Environment: an Electric Power Perspective." UNC-Chapel Hill Institute for the Environment Energy and Environment Lunch Series, December 2014.
